You now can add data to Excel directly from a photo Using the Excel app, just take a picture of a printed data table on your Android or iPhone device and automatically convert the picture into a fully editable table in Excel.. I did glean from many of the reviews that deleting prior versions of MS Office would be a good idea and I did so.. This new image recognition functionality I was moving from Office for Mac 2011 for the same reasons other reported that it was no longer playing nice with Mojave.
